## Enrich Your Expertise On Essential Oil Analysis

Essential oils can vary strongly in composition from region to region and supplier to supplier. Their composition depends on different factors including geo-climatic conditions and habitat. Because of its high market value, essential oil is frequently adulterated or counterfeited. Hence, chemical analysis is a crucial and mandatory step carried out by researchers and QC labs for their ultimate use.

In this workshop, you will learn the basics and advances of essential oil testing, analytical technological developments and hands-on best practices from technical experts and get a chance to interact with eminent scholars of EOAI.

This event will also further strengthen the collaboration and partnership between Agilent Technologies India Pvt. Ltd., and Essential Oil Association of India (EOAI) towards ensuring the safety, quality and efficacy of essential oils in the national and international market and supply chains.

You are cordially invited.

Come, make the most use of this workshop.

Detailed agenda overleaf.
